MANAGER Chair

MINDFORM

Supersized 3D Armrest

Supersized armrest pad 11CM.
Full support for arm strength.
Explains how the arm can be
more comfortable and relaxed.
Different from ordinary
narrow handrails.

Built-in steel plate

Built-in 6MM steel plate,
stabilize the armrest

Wire control adjustment button (right)

The seat height can be freely adjusted by 10cm by
touching the Wire control button of the mechanism.

The seat can be adjusted by
sliding back and forth to
support different postures
and maintain health.

- 1 Wire control button to adjust
the seat to move forward and backward
- 2 The wire control button adjusts the gas lift
so that the seat can be up and down

Sofa Type Thick Cushion

80MM thickened injection foam is
super comfortable to use.
High resilience,
reduce hip pressure,
healthier.

1 Nylon seat frame

Nylon seat frame, no plywood, 100%
recyclable, more environmentally friendly.

2 Aluminum Mechanism

Aluminum mechanism, free to adjust the
tilting force, more convenient.

Wire control adjustment button (left)

The back can be tilted up to 20° with a touch of the
adjustment wire control button, and the four-level free
locking can precisely control your comfort point.

Practical base designed with track elements

Patented track design base
Stable and non-slip. It is more comfortable
to lift the thighs with both feet, sitting for
a long time, the legs are not numb.
